

# The Deerlick Astronomy Village

A Distinctive Dark Sky Community  
[www.deerlickgroup.com](http://www.deerlickgroup.com)

## Imagine a Place...

Imagine the ultimate astronomy village. Imagine a site built by astronomers, for astronomers, with all the comforts you could want. We are building that site today.

The Deer Lick Group, LLC, a group of amateur astronomers from Atlanta, has purchased a 96 acre plot of land located in one of the darkest regions of Georgia. There is little to no development going on in the area, and the skies are very dark. We have lots of cleared space, and the horizons are wide open. This won't be just an empty plot of land, we are developing it for our needs, we are building a distinctive dark sky community

## Field Memberships

The easiest way to join the DAV community is to purchase an annual field membership. This will give you access to the huge common field with electrical hookups, as well as common facilities such as restrooms, a picnic pavilion, and a warm up shed. There are nature trails to walk on, and plenty of green space to enjoy. Camp on the field, or set up a tent among the trees in our conservancy area.

## Leased Lots

Want to build a roll-off-roof or dome observatory? Perhaps just storage shed and a cement pad of your own? We are offering long-term leased plots, typically 50'x50', for exactly this purpose. We have access to observatory plans, and can help you design and build your observatory.

## Purchased Lots

How does your own cabin with a permanent observatory just outside your door sound? We are selling large, 2 acre - plus, lots in this distinctive astronomy community. Sales are subject to community restrictions to protect our community and your observing experience. Build a log cabin for weekend retreats away from town, or have your own house and garden in the country. Lots starting in the \$30,000
